I'm a full-stack software engineer based in the Phoenix Valley, specializing in building scalable web applications and leading development teams. With a bachelor's degree in mathematics and statistics from ASU, I bring strong analytical thinking and problem-solving skills to software development. I have extensive experience across the full stack, from modern frontend frameworks to robust backend systems, and I'm passionate about writing clean, maintainable code.

EXPERIENCE

Senior Software Engineer · Geviti

2026 – Present

Building features for a comprehensive health and longevity platform that combines bloodwork analysis, personalized supplement protocols, prescription therapies, and care team coordination. Developing tools that help users track their health metrics and optimize their well-being through proactive, data-driven care.

Senior Software Engineer · One Origin

2022 – 2025

Lead full-stack development of enterprise software products for Arizona State University, including complex data processing platforms and educational tools. Architect scalable solutions using modern technologies, mentor junior developers, and drive technical decision-making to deliver high-quality products on time.

Software Engineer · Freelancing

2020 – 2022

Delivered custom web solutions for small businesses, focusing on responsive design, performance optimization, and user experience. Built static sites and web applications that helped clients establish and grow their online presence.
